2024 Annual Report

Message from the Chief

As I optimistically write this in early December, I'm able to look back and see the positive steps the department took this year. Steps that lead forward. I have always believed that if you aren't moving forward, you're going backward.

The two and half years I've been in Vermilion have been a whirlwind. I have met many wonderful people that, while not in safety services, have the same goal as I do and that is making this department and city better. The hospitality and care that has been expressed is sometimes overwhelming. Simple things such as being told that people appreciate the direction the department is going. Of course we always appreciate the snacks that get dropped off at the station from groups such as the Girl Scouts and Daughters of the American Revolution ! Each year as our Vermilion Fire Company prepares for the annual steak fry fundraiser, many local businesses step up to help and contribute and make the event so successful.

In terms of oversight, the department is blessed to be supported by our Mayor and council, who, just like the members of the department, want the best for Vermilion residents. Our Finance Director Amy Hendricks and her staff insure we are stewards of your tax money in the day-to-day operations. I'm also impressed how helpful our service department workers have been, and working side-by-side with Chief Hartung's men and women is an absolute pleasure.

In 2023 the department responded to the second highest number of calls in its history. In 2021, the record was set at 260 calls for the year. This year, in the first week of November, our call volume surpassed that number. Information later in this report documents where we've seen these increases.

As year three of my tenure here approaches, I would be remiss if I didn't express my gratitude for the hospitality shown to me by city officials and residents. However, the thing I'm most thankful for are the men and women that comprise this department. As a small department, our members sacrifice time away from their families, hobbies and sometimes their full-time jobs. This year was the busiest ever, our roster was smaller than normal, and yet the firefighters and officers of this department continue to train and respond when needed. I am forever grateful for their dedication to serving the community that they live in.

As a city divided by county lines, our members continue to provide services to county-led teams from both Erie and Lorain County. Members participate in the Lorain County

Hazardous Materials Team, as well as on the Erie County team, for which I am now the coordinator for the Erie County team. Additionally, VFD members participate in the Lorain County Technical Rescue Team aided Lorain County communities involving water rescue, structural collapse, and rope rescue.

While I am the coordinator for the Lorain County Fire Chief's Incident Management Team, or IMAT, we have built a strong partnership with other local agencies in planning our response to specialized events, such as large gathering events (Ice-A-Fair, Woollybear, Festival of the Fish). That planning includes working together with our partners in law enforcement and EMS to prepare for worst-case scenarios.

We were so fortunate this year to receive a grant from the federal government to purchase new air packs for the department. This $302,000 grant is such a game-changer in terms of our finances for years to come. Future Vermilion Fire Chiefs can breathe a sigh of relief because of this grant.

Looking to future, beyond 2025, the department will continue to study how we use our apparatus, which will help determine when they are to be replaced, or not. Many of these types of decisions are put into committees, made up of officers and firefighters to help determine the direction of THEIR department. As the chief, I fully believe in allowing the members to help shape the vision and plan for the future. To go nautical for a moment, I'm not hoisting the sails, I'm simply steering the ship...and I am inspired by the direction we are going.

In closing, it is important for me to remain open and honest with you, our customers. We want to give you the best service possible, and our dedication to training reflects that. If you have questions, call me, text me (440-396-2415), email me at wbrown@cityofvermilionohio.gov or stop at the Douglas Street station and ask me. The men and women of VFD are here for you.

Mission Statement:

Protecting the citizens of our response area; the Vermilion Fire Department is a combination department, staffed by professional, paid per call firefighters who are committed to providing courteous and cost-effective fire protection, fire prevention, as well as a wide array of emergency services.

Committee Participation

"Fire departments can honor their traditions and remember their past while STILL making meaningful forward progress and focusing on the future."

Author Unknown

Moving into 2024, several committees were formed, made up of not only command officers, but also firefighters. With the above quote in mind, the department was/is looking for forward progress with an eye on the future. No one person should be tasked with that job on their own. It takes a diverse group to meet, brainstorm ideas and help form a plan to move forward.

Vermilion Fire has a wealth of knowledge within its ranks and to not use that knowledge, defeats forward progress. With that in mind, the following committees were formed and continue to add to the value of Vermilion Fire.

Technical Rescue Committee

Committee Lead: Firefighter Chris Lassen

Committee Members: Assistant Chief Doug Keith, Lieutenant Scott Innes, Firefighter/Lieutenant Bryan Smith, Firefighters Dom Statford, Tyler Keith, and Rick Thrasher

Objectives:

- Make recommendations regarding Standard Operating Procedures/Guidelines
- Equipment needs
- Storage and location of equipment
- Training needs

Communications Committee

Committee Lead: Captain Derek Kuba

Committee Members: Firefighter/Lieutenant Mike Frisky, Firefighter Mike Dunegan

Objectives:

- Evaluate radio frequency use
- Determine use/function/location of older portable radios

Fitness Room Committee

Committee Lead: Lieutenant Doug O'Donnell

Committee Members: Firefighters Rick Thrasher, Ben Roberts and Chris Lassen

Objectives:

- Determine the equipment needed
- Research possible funding avenues
- Research policies needed

Apparatus Utilization Committee

Committee Lead: Chief Brown

Committee Members: Captain Kirk Horton, Lieutenant Scott Innes, Firefighter Tyler Keith

Objectives:

- List each VFD vehicle and its intended use
- Determine if the current model is safe, effective, and efficient
- Make recommendations on how we should use our apparatus

Apparatus Replacement Committee

Committee Lead: Chief Brown

Committee Members: Assistant Chief Doug Keith, Captain Bob MacLean, Lieutenant/Captain Derek Kuba, and Firefighter Tyler Keith

Objectives:

- List each vehicles:
  - Mileage
  - Costs
  - Responses
  - age
- Determine what we actually NEED
- Acquire quotes for refurbishment versus purchasing new
- Implement a 10-15 year replacement schedule

Public Education and Community Relations

By Chief W.H. Brown

It's easy to overlook or not to emphasis it, but giving back to the community should be a priority for every public safety department. The very people that give us the opportunity to serve need to know their fire department, see them in the community, and interact with them often. I'd like to highlight some of the public activities VFD participated in this past year.

Fire Station Open House

Annually, the department opened it's doors to the public for an open house. In 2023, the decision was made to hold the event on the first Monday of Fire Prevention Week in October and we couldn't be happier with the turnout the past two years.

Interactive displays and demonstrations, giveaways, and hot dogs are the normal things you'll see, but in 2024 we added a local vendor, "Hawaii Ice" to give our guests a sweet alternative. Also on hand was Lifecare EMS and a unit from the Vermilion Police Department, and representatives from the Ritter Public Library who were distributing free fire blankets.

Stuff the Truck

A new activity was added this year, when department members gathered to get school supplies, prior to school starting. Partnering with our local Discount Drug Mart, firefighters staged at Drug Mart and collected supplies and donations from patrons totaling over $1,200. These items were then divided among VES and Sailorway schools.

Trunk or Treat

A huge event, VFD sent a unit to participate in the annual "Trunk or Treat" at Vermilion Elementary School to hand out candy and spread our fire safety message.

Salvation Army Kettle Campaign

For years, we've all seen the bell ringers around Christmas time, collecting for the Salvation Army and their programs. In 2024, it was decided that VFD would help fill the schedule for this worthy cause. So, our firefighters spent ten hours ringing the bell at Giant Eagle; spreading cheer and interacting with the Giant Eagle staff and customers.

Santa on the Fire Truck

A local tradition dating back many years ago, this years "Santa on a Fire Truck" didn't disappoint. Annually, Santa and his helpers load up and travel nearly all the streets through the city, waving to little and big kids. The past two years, Santa has dodged getting sick, as the weather has not been very cooperative.

Operation Christmas Joy

An event that has been happening for quite some time, "Operation Christmas Joy" aims to collect food items for local families and VFD was proud to help in 2024. VFD was able to provide seven personnel and two spouses to help load bags and deliver them to families in need. Local insurance agent, Brad Schwab has made this program big and helps so many families during the holiday season.

"Our essential mission and number on priority is to deliver the best possible service to our customers."

Chief Alan V. Brunacini
Phoenix Fire Department

EMS Operations

By Lieutenant Bryan Smith

How a city chooses to cover emergency medical services varies from city to city. Since 2019, the City of Vermilion has contracted with Lifecare EMS of Elyria to provide primary EMS care for Vermilion residents. Vermilion Fire assists Lifecare on certain types of calls within the city or Brownhelm Township.

The department has members who are trained in emergency care with different certification levels. Currently, the department has three paramedics, eight EMT's and three Emergency Medical First Responders among our ranks. Additionally, in the spring of 2025, Firefighters John Miles, Braydon Dotson, and A.J. Ramthun are enrolled in an EMT class through EHOVE, which will strengthen our EMS capabilities.

Through our partnership with University Hospitals, life-saving drugs and equipment will be stored on VFD apparatus this spring. The department, through the years, has purchased medical equipment such as automatic external defibrillators, suction units, splints, and backboards to use when needed on medical calls.

While our medical assist calls have stayed relatively steady, making up approximately 25% of our calls; growth in the city will add to the call volume. The following chart details the types of calls VFD responds to, assisting Lifecare as needed.

EMS Calls	*Additional Information*
Burns	
Choking	
Diabetic Issues	
Difficulty/Not Breathing	**Shortness of Breath**
Driver Needed	
Drowning	
Electrocution	
Falls	**Greater than 6'**
Full Arrest	**Heart Attack**
	Possible Heart Attack
Hemorrhage	**Severe/Excessive Bleeding**
	Uncontrolled Bleeding
Lift Assist	
Overdose	
Traumatic Injury	**Broken/Fractured Bones**
	Loss of Limb
	Impaled Object
Unconscious	
Unresponsive	

Deputy Chief Chris Stempowski (retired)

By Chief W.H. Brown

This year saw the career of longtime member Chris Stempowski come to a close. Hired in January of 1990, Stempowski enjoyed a fruitful thirty-four-year career with the Vermilion Fire Department.

Promoted to Fire Chief in July 2006, Stempowski took over for the "Legend" Eugene Kropf and served as the chief until June 12, 2022, when he stepped down and accepted the title of Deputy Chief. Through his thirty-four-year career, Chris helped move the department forward by upgrading equipment, increasing training levels, and most notably, the building of a new fire station on Douglas Street.

Since his retirement from the Ford Motor Company in the summer, Chris can enjoy his free time and is no longer tied down by his pager ! We wish Chris all the best and thank him for his years of service to the City of Vermilion.

Firefighter Ron Knox (retired)

The year was 1996...the Fox News Channel was brand new. The Amber Alert system was created and the Cowboys won Super Bowl 30. Current Lieutenants Scott Innes and Doug O'Donnell, along with Firefighters Taylor Perchinsky and Braydon Dotson weren't even born yet. But that September, Ron Knox was appointed to the Vermilion Fire Department !

April 1, 2024 saw Firefighter Ron Knox officially retire from the department after twenty-seven years of service. A long-time driver for UPS, Knox officially entered the retired world from both of his careers.

Always personable and quick-witted, Knox served his community with dedication. Also a Hazardous Materials Technician, Knox was a member of the Lorain County Hazardous Materials team and was a valuable member of the Vermilion Fire Department. The firefighters and officers of the department wish Ron and his family well and hope he will enjoy his new free time.

Section 2: Department Finances

Current Financial Status

As the department enters 2025, we do so in strong financial fashion. Vermilion is blessed to have a finance director, Amy Hendricks, whose award-winning staff manages and maintains the various department's budgets, utilizing modern accounting principles.

Fiscal Year 2024 saw relatively no change in our budgeted items, however, news in August that the department had received a grant for over $302,000 to purchase new airpacks (SCBA) prevented the strain that would have occurred had the department purchased 3-5 new units, as planned.

Additionally, changes in the apparatus maintenance schedule also allowed the department to redirect some of those funds to purchase equipment. Continuing with our annual purchasing of turnout gear; the goal is to have each member with two sets of gear, plans were to purchase three sets, estimated at approximately $10,911. However, again, we received the announcement that the department was awarded a $10,000 grant through the State Fire Marshal's office. With that, four sets of gear were purchased, with a cost of only $3,637 to the city.

2025 will see much of the same planning and spending, with the exception that our planning model for SCBA's will be revised to reflect the purchase of thirty new units. Turnout gear, which will always be a capital item to plan for, will be purchased again and that planning model will be updated as well. Truck maintenance will continue, with trucks receiving a semi-annual service, in lieu of an annual service.

The following, provided by the city's finance department, shows budgeted and spent amounts for the fire department in 2024, in addition to the budgeted amounts for Fiscal Year 2025.

		2024 Budgeted	*2024 Spent*	*2025 Budgeted*
206	***Fire Operating Fund***			
	Personal Services: salaries, insurance, worker's compensation, etc.	$271,630	$252,485	$280,000
	Professional Development: continuing education classes, professional memberships, etc.	$15,300	$8,886	$15,750
	Contract Services: utilities, vehicle maintenance, radio maintenance, facility maintenance, etc.	$268,036	$204,037	$276,000
	Materials & Supplies: fuel, building supplies, protective clothing, etc.	$36,051	$31,460	$37,150
	Capital Outlay: equipment & fixtures, improvements, etc.	$5,153	$2,153	$5,300
207	***Fire Apparatus Fund***			
	Contract Services: engineering, auditor fees, etc.	$193,482	$22,055	$197,500
	Materials & Supplies: minor equipment, etc.	$10,000	$561	$10,000
	Capital Outlay: land, vehicles, buildings, etc.	$106,718	$28,217	$125,000
	Debt Service: principal payment, etc.	$255,000	$212,156	$260,000
	TOTALS:	***$1,161,370***	***$762,010***	***$1,206,700***

Capital Expenditure Planning

The fire service, for lack of a better analogy, is a business. Unfortunately, the cost of business is constantly rising and to address the changes we see, we must be able to adjust and adapt. Our most costly asset is our fire trucks. These specialized vehicles come with annual requirements for service, testing and maintenance. The National Fire Protection Association (NFPA) mandates the life cycle of the tires we run.

Unlike a staffed, career fire department, the budget of a smaller, combination or completely volunteer department is drastically different. Where a large city would be replacing fire apparatus every ten years, the smaller departments are able to double that service time. The biggest financial difference comes with payroll. Most cities with a full-time department, it is a safe bet that 90% of their budget is for salaries and benefits. Whereas smaller departments, their salary line makes up 30%-40% of the total budget.

The next few pages detail the Vermilion Fire Department's three biggest capital concerns.

Fire Apparatus Fleet Status

One of the biggest capitol assets of the city and its individual departments is a fleet of reliable vehicles. Whether it's a backhoe, pickup truck or fire engine, our city's employees need this equipment to successfully complete their mission. Firefighters depend heavily on the performance and capabilities of their vehicle when operating to protect life, property and the environment. To maximize these capabilities and minimize their risk of injury, it is imperative that the apparatus be equipped with the latest safety features and current operating capabilities.

Often, fire apparatus are specifically designed for the area it will serve. An example would be designing a fire engine that has a short wheelbase with an excellent turning radius. Imagine a rear, dual axle engine, navigating the VOL neighborhood. This is just one of the many concerns when designing and purchasing a new fire engine.

Thankfully, the City of Vermilion Fire Department has maintained a fiscally sound fund for apparatus replacement through the years. This fund is used to periodically replace fire apparatus. Each type of fire apparatus is assigned a general life cycle based on the specific use of the vehicle and will vary greatly according to the department's annual incident/run volume. So, when looking at the usefulness of a piece of equipment, there are at least three different life cycles to consider: service life, technological life and economic life as well as some immeasurable costs.

The service life of a vehicle is when a piece of equipment can perform its needed duty. When considering service life in a city such as Elyria, engines and rescue trucks can normally get ten years of service. However, an engine in the City of Vermilion can easily remain in service for twenty-five years. Service life is dependent on several factors and variables. The most important are mileage, number of responses, overall wear, pumping capacity and operating capability.

The technological life of a vehicle is its capability to serve the role it was initially designed for. Vehicles from fifteen years ago most likely did not have a seat belt warning system. Today, it's a standard that the fire service has demanded. While older vehicles may still be capable of performing the tasks they were designed for, they cannot match the performance requirements of new vehicles. Speed, acceleration and breaking ability with new technologies such as antilock braking systems, traction control and rollover stability are some of the new technological advances of newer apparatus.

The economic life of a vehicle is its total expense for effective use over a given period. These costs include depreciation, operating costs, fuel, oil, maintenance, repairs, downtime replacement and operator training. All these factors come into play when determining the vehicle's economic life. The cost to maintain a given vehicle increases with time, until it is more expensive to operate than maintain.

Given the magnitude of fire apparatus costs; it is vitally important to have a fluid, definitive plan on apparatus replacements. Just like most industries today, the manufactures of fire apparatus are hit with the same supply issues. Currently, most custom-made trucks will take anywhere between 18-36 months to build. The following is a basic picture of the Vermilion Fire Department's vehicle fleet with their use and expected replacement schedule.

Station 1 Apparatus

Year Purchased			Original Cost	Estimated Replacement Cost	Potential Replacement Year	Average Annual Mileage
Tanker-85	2008	Pierce Impel	$479,919	$850,000	2040	540
Tower-90	1999	Sutphen, 100' Tower	$600,000	$300,000	?? 2024 ??	300
Engine-94	2010	Pierce Impel	$526,000	$800,000	2039	780
Brush-95	2008	Ford, F-250	$24,708	$90,000	2030	1,500
Rescue-98	2021	Pierce Enforcer	$616,619	$815,000	2046	300
Command-99	2018	Ford Expedition	$65,000	$75,000	2029	4,500

Station 2 Apparatus

Year Purchased			Original Cost	Estimated Replacement Cost	Potential Replacement Year	Average Annual Mileage
Engine-81	2006	Pierce Saber	$395,768	$1,800,000	2036	2,200
Engine-84	2001	Pierce Saber	$252,360	620,000	n/a	800
Brush-92	1985	Jeep, CJ5	$7,500	n/a	n/a	10
Engine-96	2004	Pierce Saber	$316,890	$650,000	2029	2,400
Brush-97	2008	Ford, F-250	$24,708	$55,000	n/a	850

Reserve/Out of Service Apparatus

Year Purchased			Original Cost	Estimated Replacement Cost	Potential Replacement Year	Average Annual Mileage
Brush-86	1977	Jeep, CJ5	$5,696	n/a	n/a	0
Utility-89	2000	Chevrolet Blazer	$20,000	$20,000	n/a	400

In 2023, a committee was formed, consisting of Chief Brown, Assistant Chief Keith, Captain MacLean, Lieutenant Kuba and Firefighter Keith to analyze the fleet and make recommendations on a long-term plan for apparatus replacements. Included in these recommendations will either be one of three options. First, will the truck be replaced. Second, instead of replacing the vehicle, would it be feasible to simply have the truck refurbished; thus, saving a great deal of money. The final option when looking at the individual trucks, is whether we still need that truck to maintain our readiness.

Keeping in the spirit of fire apparatus issues, a long overdue plan was implemented to deal with tire replacements on the fleet. The National Fire Protection Association, or NFPA, puts out standards that provides guidelines to the American fire service. NFPA 1911 provides departments with guidelines dealing with fire apparatus. Specifically, this guideline recommends that tires on fire trucks should be replaced every seven years.

For an ambulance, or a busy city department, the seven-year timeframe is logical, however in smaller departments, it may be a bit excessive. In 2023, original tires were replaced on Tanker 85 (2008), Tower 90 (1999), and Engine 94 (2010). This service, which we were able to complete within the confines of our budget, cost $13,604.58. So, now, for the first time, the following tire replacement schedule has been implemented.

Replacement Year		Tire Age	Projected Cost
2024	Engine 81	18 yrs	$2,704
	Engine 96	20 yrs	$2,704
2025	Truck 95	17 yrs	$1,532
	Truck 97	17 yrs	$1,532
	Command 99	6 yrs	$1,532

Self-Contained Breathing Apparatus (SCBA)

Two of the greatest needs for the department were to replace an aging radio system and replace thirty-one, very dated SCBA's. Fortunately, in 2021, the department was awarded a grant for over $600,000 to replace our radio system, in conjunction with Lifecare Ambulance. This shared grant will give VFD the ability to communicate with ALL our mutual aid partners for about $30,000, saving our citizens a great deal of money.

However, the need for new airpacks continues to be vitally important. In 2022, the department applied for an Assistance to Firefighters Grant (AFG) for just over $260,000 to replace the dated air packs. Unfortunately, we were not awarded the grant. However, in August of 2024, the department was awarded an Assistance to Firefighters Grant (AFG) to replace thirty units, sixty bottles and thirty new masks. The city will receive a check for $302,000 to purchase the new SCBA's from Atlantic Fire Equipment.

This project directly involves the life safety of our firefighters and the obsolete SCBA's that are currently worn into dangerous atmospheres. The NFPA 1981 standard was established to enhance the life safety of firefighters working in these atmospheres and to ensure their SCBA units would function in hazardous conditions. With an emphasis on life safety, the department will for the first time be compliant with NFPA 1981.

In 2023, the grant was written for $260,000, however for 2024, we asked for $321,600 to fulfill the safety needs of the fire department and cover the cost increase.

Without this grant, the department would be forced to purchase several units each year to attempt to become compliant.

Firefighter Turnout Gear

The very equipment that firefighters wear to every call is subject to strict guidelines on its use and care. Starting at the top with the firefighter's helmet, each piece of gear is mandated to be cared for and properly maintained. Additionally, every piece of the firefighter's ensemble has a service life of ten years. Some pieces of the equipment, such as the helmet or boots, can still be serviceable past that ten-year period. However, do we take the chance that something is "still good"?

Again, thanks to the State Fire Marshal's grant, we were able to save our taxpayers $10,000 and were able to purchase four new sets of gear. When planning for large, capital items require a systematic plan for replacing gear, apparatus, etc. The following schedule details our ten-year replacement plan.

	Compliant Units	Compliant Units Needed	Need to Purchase	Total Cost
2024	5	30	4	$14,458
2025	9	26	3	$14,603
2026	12	23	3	$15,187
2027	15	21	3	$15,794
2028	18	18	3	$16,425
2029	21	15	3	$17,082
2030	24	12	3	$17,765
2031	27	9	3	$18,475
2032	30	6	3	$19,214
2033	33	3	3	$19,982

Section 3: Training

2024 Training Overview

By Captain Derek Kuba

Looking at the response area covered by the Vermilion Fire Department, it brings many challenges, including just under two miles of lake shore and several miles of the Vermilion River. Within the river system it has many areas of steep terrain and near vertical drop offs. Nearly 5,200 residential housing units and just over 1,200 commercial businesses. Included in the service area are several miles of State Route 2, including east and west bound service plazas in Lorain County. Within its contractual portion of Brownhelm Township sits nearly 100 acres within the Vermilion River Reservation.

VFD had an emphasis on drilling on the basics in 2024. A major focus was search and rescue, hose line deployment, and Vent-Enter-Search. Many hours were spent in the station perfecting these vital skills to serve our jurisdiction and mutual aid partners. Firefighters also spent many hours drilling with ropes and hardware. Additional training included pump and hydrant operations, ladders, swift water awareness, and aerial operations. Firefighters Chris Lassen and Rick Thrasher have had a pivotal role in training this year, bringing many years of knowledge to the forefront for our department. Lassen, a retired firefighter from Lorain, and Thrasher, a retired Lieutenant from the City of Elyria have many years of practical experience and knowledge that has helped train the next generation of Vermilion firefighters.

In 2024, Firefighters John Miles, Braydon Dotson, and A.J. Ramthun completed the Firefighter 1 training through the Lorain County Fire Chiefs Training Academy. Through Firefighter Thrasher's connections at the Ohio Fire Academy, many of our members completed an 8-hour instructor-led course on tactical natural gas response emergencies. In early 2024, VFD had planned on hosting an Ice Rescue Technician class through Ohio Fire Academy but due to warm weather and no ice the class was cancelled. Another class has been planned for 2025 pending colder weather. Three firefighters will be starting their Firefighter 1 fire training in February and three firefighters are enrolled for EMT-Basic course, also starting in February. Through our partnership with University Hospitals, monthly training is also planned for continuing education for our medical personnel. To work with some of our mutual aid partners, VFD has teamed up with Florence Township Fire Department and the Wakeman Fire District to bring monthly training for individuals holding these necessary medical certifications.

Tech Rescue Training Program

By Lieutenant Scott Innes

This past year we have focused much of our technical rescue training on two disciplines. While we can get called to any type of rescue, rope and water related rescues are more common for our jurisdiction. Not only do we have Lake Erie, but we also have the Vermilion River, much of which is sided by steep hills or cliffs. Vermilion Fire is lucky to have two highly trained firefighters on our roster. Firefighter Rick Thrasher and Firefighter Chris Lassen, each with extensive training, have helped bring our tech rescue training to the next level.

We trained on perfecting our low angle rope rescues and worked on standardizing a rope rescue system that we will use most every time. Streamlining these types of rescue operations cuts out the confusion and sets an expectation and procedure that everyone knows. When it comes to water rescues, Vermilion Fire has two Swift Water Rescue Technicians and two Swift Water Rescue Operations level members. These four members are subject matter experts and are trained to either make a rescue in a boat or by entering the water for a "go rescue". This year, we focused our water training on what other things can be done by the rest of the department in the event of a rescue. Some of the training conducted includes how to set up and deploy the boats, notice hazards, coordinate/request the appropriate resources and attempt a rescue from shore with a throw bag. Members went down to Mill Hollow to practice the different techniques in throw bags while the Swift Water Techs entered the river and were the targets for the exercise.

One of the many good things that comes from constant training is the recognition of the necessary equipment and how the fire service is ever evolving. While training on our rope and water rescues, our Technical Rescue Committee was asked by Chief Brown to meet and report back with equipment needs and figure out what system works best for Vermilion. In the rope rescue world, we switched our rescue system over to a "twin tensioned" system and bought the necessary equipment to make Vermilion Fire safe, effective, and efficient. For water rescue, we recognized the need for more life jackets and throw bags. These reviews of our equipment and procedures will help us stay up to date and always in a state of readiness.

The world of technical rescues is one that requires immense amounts of specialized training in a wide variety of disciplines. To list a few: structural collapse, confined space, rescue diver, trench rescue, rope rescue, and water rescue. All of these require their own independent training and certificates. There are several different ways these can be obtained. In the relatively immediate area, the Ohio Fire Academy in Reynoldsburg offers all disciplines and they are free to volunteer departments. Thankfully for us, Firefighter Rick Thrasher is one of the people in charge of the Oho Fire Academy technical rescue program, so we are constantly getting the best information and opportunities. In addition to the Ohio Fire Academy, Sandusky Fire hosted a Confined Space

Rescue class, which Chief Brown attended. In the Spring of 2025, they will be hosting a rope rescue operations course which our members will be able to attend.

It is safe to assume that Vermilion Fire can get called to any type of technical rescue at a moment's notice and it is a massive undertaking to try to train in all the possible scenarios that we could ever encounter. Just this year alone we have responded to vehicles into buildings, water rescues on the lake shore, low angle rope rescues, wide area searches for lost people, and tree entrapment. That is a lot of different types of disciplines to cover on just Monday nights for two hours on top of all the other training the fire service requires of us. Vermilion, being uniquely located in two counties, allows us to take advantage of the resources that they both have to offer. In Lorain County there is a specialized team called the Lorain County Technical Rescue Team that has members from all the departments in Lorain County that makes up a team that is trained in every discipline and can be called upon by any department at any time.

In 2025 our course of navigation will remain the same. Train, train, and train some more because you can never be over prepared in the fire service. Some goals set forth by the Technical Rescue Committee are to get members trained in vertical rope rescue; have all members complete the boater's operation course; put members through a more advanced swim test; and work with a company in Cleveland, called Argonaut to develop a surf water rescue program, and to update equipment and procedures as needed.

"Being a firefighter involves inherent risks. It's up to us to distinguish between taking calculated risks over unnecessary or reckless ones. For a well-trained firefighter, the choice is clear!"

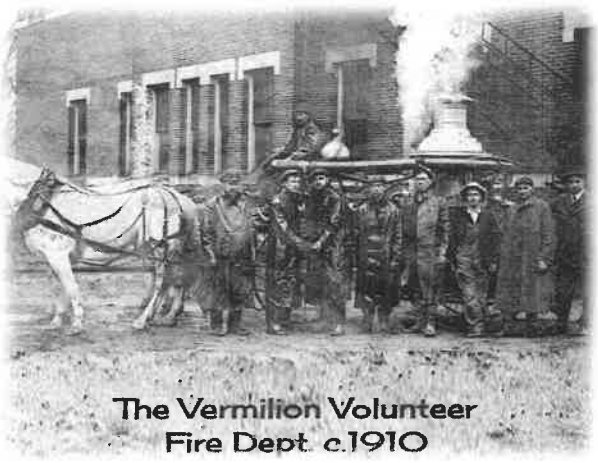
Section 4: Incident Statistics

Department Profile

The Vermilion Fire Department (VFD) is a combination department originally founded as a 100% volunteer department. The department has evolved from a paid per call, to a combination department, employing its first career fire chief in 2022 and approximately twenty-one paid-per-call personnel.



The Vermilion Volunteer Fire Dept. c.1910

The VFD provides fire suppression, prevention, education, emergency medical first response and a variety of special rescue operations. The department, governed by a "Mayor-Council" form of government, provides service to the residents of the City of Vermilion and is contractually used to cover a portion of Brownhelm Township. The department is also signed into mutual aid agreements to accept and provide services to our neighboring communities when available.

The City of Vermilion, located partially in Erie County, and partially in Lorain County, is scenically located on the southern shores of Lake Erie. From quaint shops to fine dining, the arts, entertainment and unmatched festivities, Vermilion truly has it all. The city is home to approximately 10,594 residents, occupying approximately 10.8 square miles. Additionally, Brownhelm Township is home to approximately 7,618 residents, occupying just over 40 square miles. Brownhelm Township is divided into three areas; and receives its emergency services from the City of Vermilion, Florence Township, and the Village of South Amherst.

The VFD utilizes the services of its members responding from two stations. The stations, and city, are separated by two heavily traveled east/west corridors of the Norfolk-Southern railroad, as well as the Vermilion River, a tributary to Lake Erie. The district provides fire, and rescue services and provides first response services to Lifecare Ambulance, based out of their Douglas Street station.

Fire Stations:

Station 1; located at 1041 Douglas Street

- Dedicated on May 15, 2021
- Main administrative offices; Office of the Fire Chief
- Dispatching capabilities
- (4) drive thru bays; housing (7) apparatus
    - Tanker 85; 2008 Pierce; 3,000 gallon tank; 1,500 gpm pump
    - Engine 94; 2010 Pierce;1,000 gallon tank; 1,500 gpm pump
    - Tower 90; 1999 Sutphen; 300 gallon tank; 1,500 gpm pump
    - Rescue 98; 2021 Pierce Heavy Rescue
    - Brush 95; 2007 Ford F-250; 200 gallon tank
    - Brush 97; 2007 Ford F-250; 200 gallon tank
    - Command 99; 2018 Ford Expedition
    - Boat; 13' Inflatable AB (Profile); 25 hp Yamaha
    - Boat; 12' Inflatable AB (Profile); 15 hp Evinrude

Station 2; located at 385 Overlook Road

- Office of the Deputy Chief
- Dispatching capabilities
- (4) bays; housing (4) apparatus
    - Engine 81; 2006 Pierce;1,000 gallon tank; 1,500 gpm pump
    - Engine 84; 2001 Pierce;1,000 gallon tank; 1,500 gpm pump
    - Brush 92; 1985 Jeep CJ-7; 100 gallon tank
    - Engine 96; 2004 Pierce;1,000 gallon tank; 1,500 gpm pump
    - Boat; 14' Aluminum Smokecraft; 25 hp Evinrude

Notable Calls in 2024

Looking back on 2024, the department responded to more calls for service than anytime in our history. While motor vehicle accidents were less, a large spike in natural gas leaks and false alarm calls were noted. Regardless, the department responds when called, no matter the type or severity. The modern, professional fire department must be well-versed in so many different types of calls to be successful. Fortunately, the men and women that makeup the Vermilion Fire Department are skilled, well-trained, and possess a wide variety of expertise dealing with the plethora of incidents we respond to.

The following is a summary of three of the more prominent calls VFD responded to in 2024.

Structure Fire – Idleview Drive

On the afternoon of May 13, the fire department was called to respond to a structure fire at 4771 Idleview Drive. Upon arrival, Chief Brown noted that the building was heavily involved with fire coming from both sides of the single-family residence.

Vermilion Fire crews did a primary and secondary search of the residence and found no victims. The fire was logged under control within thirty minutes of VFD arrival. The department was aided by Vermilion Township, Amherst and Florence Township fire departments.

The most remarkable part of this call was the quick, heroic actions taken by neighbors Tony Budka and Matt Green. Budka, a well-known wrestling coach in the area, and Green, an Erie County Sheriff Deputy made entry into the structure, prior to the fire department arriving to search for the elderly female who lived there. With the building on fire, heavy smoke banking down to the floor, Budka and Green quickly searched the home, rescuing the resident's dog.

Man Pinned by Tree – Brownhelm Station Road

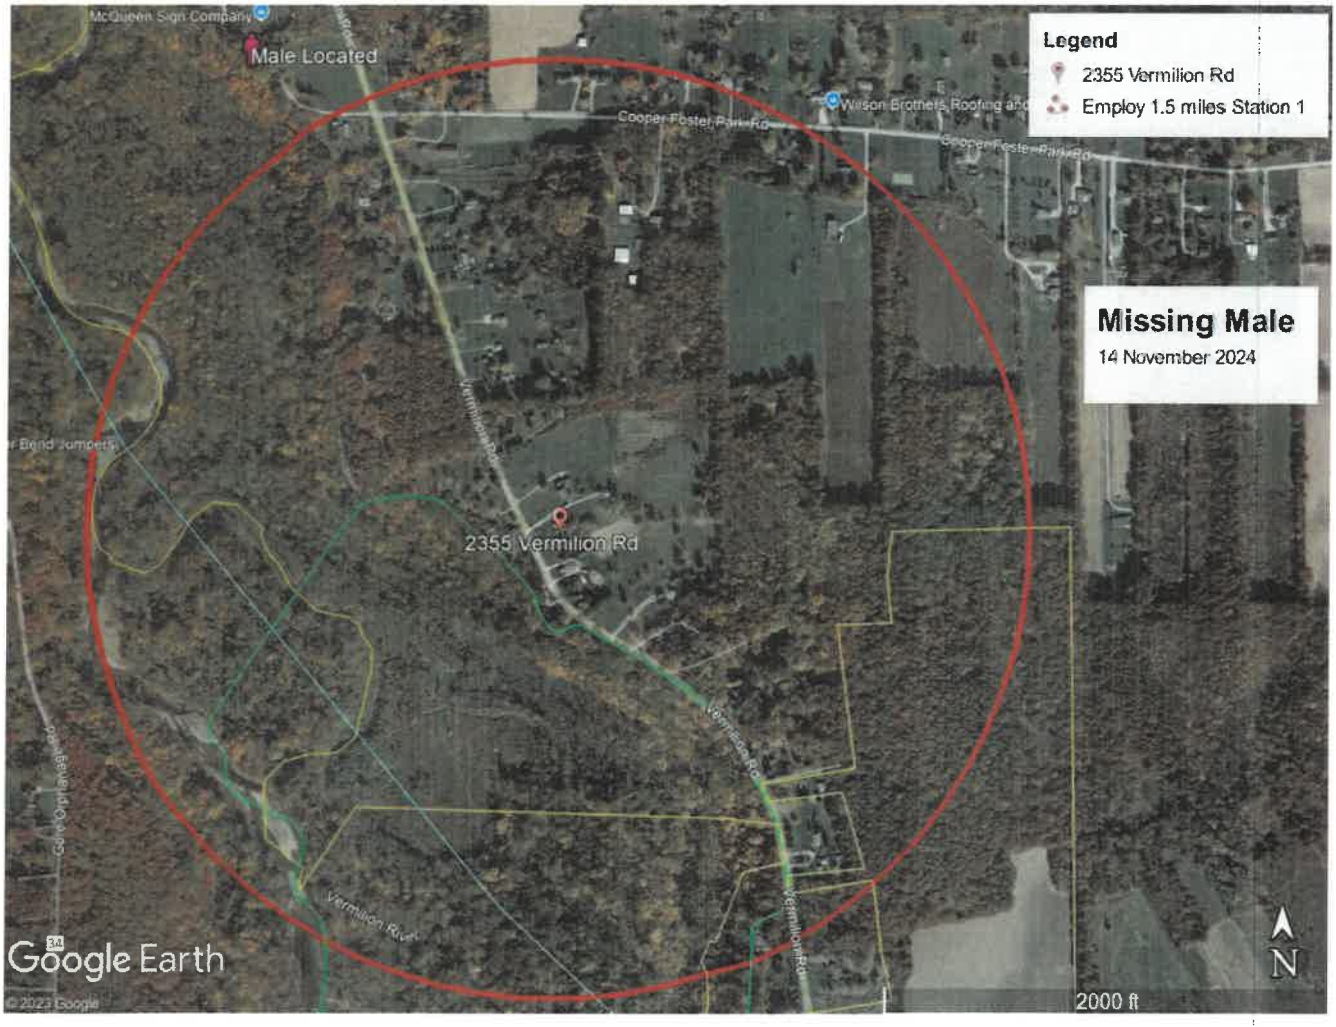
While cutting trees on their property, retired Vermilion Police officer, Dean Mayer was pinned inside his backhoe when a tree cut by his son-in-law, fell and crushed the roof of Mayer's backhoe. Within five minutes, Rescue 98 arrived to find Mr. Mayer trapped by a tree estimated to weigh 50,000 pounds. Conscious and alert, crews, with assistance from Vermilion Police, Amherst and Florence Township, began the process of freeing Mr. Mayer.

Utilizing chainsaws, airbags and stabilization jacks, the victim was extricated from the backhoe in fifty-four minutes, sustaining only a fractured clavicle. Under the command of Captain Derek Kuba, a positive, successful outcome was achieved. Normally, in a situation like this, the outcome could have been much worse, however, Captain Kuba managed the scene effectively and used his resources to ensure that the victim was not harmed further, nor were any of the first responders.

Missing Male – Vermilion Road

On November 14, we encountered another odd call as we responded to assist in locating an elderly male with dementia, who had walked away from his home. There was about a three-hour time period where this man could've left and with cold, rainy weather, time was critical in finding him. Lieutenant Bryan Smith was the officer in charge and made the immediate call for mutual aid to help with the search. In addition to the eight Vermilion Fire personnel, we had five VPD officers, six members of Vermilion Twp FD, four Florence Twp FD, four members of the Lorain County Technical Rescue Team, fifteen members of Lifecare EMS, members of the Lorain County Sheriff's department, Lorain County Metro Parks as well as family and friends of the subject.

Thankfully, at 08:27 am, the man was spotted on a security camera, less than 1000 yards from his home. Lifecare transported him to Mercy Lorain, where he was initially critical with hypothermia. Several days later, he was out of the ICU and doing great !! Without the help of our mutual aid partners and the superb job of commanding such an operation by Lieutenant Bryan Smith, this outcome may have been much worse.



2024 ISO Evaluation

In March of 2024, several city departments participated in an ISO audit. Members from water distribution, fire dispatch, and Chief Brown spent several days providing information to the ISO Field Representative so that the City's Public Protection Classification could be updated.

"The Insurance Services Office, Inc. (ISO) is the principal provider of insurance underwriting, rating and statistical information to the insurance industry in the United States. Nearly all insurance companies rely on ISO's Public Protection Classification (PPC) in calculating premiums for property insurance. Information regarding the fire department, water supply, fire alarm system, and fire jurisdiction boundaries are critical to this process."

The bottom line is that a better prepared fire department can contribute to lower insurance rates that are offered to our residents. In 2017, Vermilion was classified as a Class 3/3Y by ISO and remained the same following the latest evaluation. To better understand that rating, 83% of the over 38,000 departments evaluated are rated lower than the City of Vermilion !

This rating is a total "team effort". Numerous factors are looked at regarding how the fire department operates. Additionally, the dispatch center is scrutinized, as well as the City's water system. When its all said and done, in regards to fire protection, our city is doing very well.

Vermilion Fire Department
Incident Participation

Individuals are held accountable for the percentage of calls they make during their available periods. For example, a member who works a typical 8-5 job, does not get penalized for daytime response. The VFD Standard Operating Guideline 1000.1 addresses the percentage of calls needed to be compliant with departmental standards. Officers are expected to make at least 30% and firefighters are expected to respond to at least 25% of calls. Those members that had full-time job restraints or on medical leave were excused from making their percentage and is weighed on a case-by-case basis.
